Everblooming Roses

Roses of this class are noted for the quantity of bloom, the marvelous colors, the form, shape and beauty of the buds and flowers.

They are not entirely hardy, and in a very cold climate need winter protection.

Unless noted, 70c each

BETTY UPRICHARD—A splendid bedding rose, producing buds of copper red, the open semi-double flowers showing orange-carmine and salmon. Plant is very vigorous.

CHAS. K. DOUGLAS—One of the finest red garden roses, very thrifty and persistent in blooming habit. Flowers of crimson-scarlet, slightly fragrant.

COLUMBIA—The large, well-formed, fragrant blooms of clean, rose-pink. The vigor and healthiness of the plant explains its popularity.

DAME EDITH HELEN—Beautifully shaped buds and flowers of vivid pink. Very fragrant and a strong grower.

ETOILE DE HOLLANDE—A wonderful dark red garden rose. The best.

EDEL—Very large, shapely blooms of pure white; fairly vigorous.

GOLDEN EMBLEM—Produces the most lovely yellow blooms, but plant is delicate, and not long lived.

GRUSS AN TEPLITZ—This grand old variety is constantly in bloom; the color is a very pleasing velvet crimson-red; the plant is extremely vigorous and hardy.

KAISERIN AUGUSTA VICTORIA — Not a very strong grower but furnishes beautiful flowers of pure white with a tinge of lemon toward the center.

LADY MARGARET STEWART—The fragrant golden yellow buds shaded and streaked with burnt orange and red are truly magnificent, but are produced sparsely; fairly vigorous.

LOS ANGELES—An old favorite; very lovely flowers of salmon-pink shaded with gold at the base of petals; fragrant.

MISS ROWENA THOM—Gigantic, dark pink flowers, shaded with yellow at the center. Plant is exceptionally vigorous.

MISS WILLMOTT—A splendid white variety. The long pointed buds tipped with pink are produced lavishly. Plant is vigorous.

MME. BUTTERFLY—A free bloomer; flowers light-pink apricot and gold; especially beautiful in the fall; a strong grower.

MRS. CHAS. BELL — Globular shell pink blooms of exquisite beauty; long lasting when cut; vigorous.

OPHELIA—A very popular garden variety; flowers cream, pale-pink with a shade of yellow.

PADRE — A persistent bloomer, a strong grower, and a great bedding rose. The color is copper-scarlet.

RADIANCE—One of the very best and most popular garden roses; large brilliant pink blooms—very vigorous.

RED RADIANCE—Possessing all the good qualities of Radiance, differing only in color, which is cerise-red.

REV. F. PAGE ROBERTS—A great favorite, a strong grower. The long copper-red buds that open golden yellow are incomparable. \$1.00.

SOUV. DE CLAUDIUS PERNET — A wonderful yellow rose when at its best. First flowers are sometimes shapeless and off color but later it behaves very well; good grower.

SOUV. DE GEORGES PERNET — A noted prize winner. The immense double, orange-pink buds are most beautiful, and very fragrant; fairly vigorous.

SUNBURST — Extremely lovely blooms of yellow and orange; plant is not a very sturdy grower.

TALISMAN—A multi-colored variety showing orange, yellow, scarlet and cream. The colors are variable. Sometimes the flower is almost pure cream, again it will be dense orange-scarlet; very vigorous.

VILLE DE PARIS—This wonderful rose is a jump or two in the lead in the yellow rose race, very vigorous and free from disease.

WILHELM KORDES—The blending of colors in this lovely rose is really a sensation. The long pointed buds are golden-salmon with tints of orange and copper-red. Very fragrant. 90c.

WILLOWMERE—A grand old garden variety producing lovely shaped blooms of rich shrimp-pink shaded with a golden glow toward the center of the flower. A splendid grower.

Hybrid Perpetual Roses

Hybrid Perpetuals (June Roses) are very hardy and vigorous, the flowers are large and full and usually intensely fragrant. Some varieties bloom through the summer until frost.

70c each, \$6.50 per 10

ALFRED COLOMB—Large globular sweetly scented flowers of light-crimson; when plant is once established it blooms again in the fall.

BARON DE BONSTETTEN — Very dark, blackish red blooms; exquisitely fragrant.

CAPT. HAYWARD — Free bloomer, flowers crimson-scarlet; very fragrant; vigorous.

FRAU KARL DRUSCHKI (White American Beauty)—Large white flowers of wonderful form lavishly produced on big, strong plants.

GEO. ARENDS—Long pointed buds of the most pleasing shade of pink; very fragrant; some fall blooms.

HARRISON'S YELLOW—Big hardy bushes covered with semi-double bright yellow flowers; early.

JOHN RUSSELL—A new and splendid red garden rose noted for the exceptional color and form of the blooms.

JUBILEE—Large very dark velvety maroon flowers, intensely fragrant.

MME. ALBERT BARBIER—This new variety merits the popularity which it has gained since its introduction. Creamy-yellow with a pinkish tinge.

MRS. JOHN LAING—One of the finest roses of this class; large double blooms of clear pink, sweetly perfumed.

PAUL NEYRON—Immense pink flowers from June until frost; extremely vigorous.

Hardy Climbing Roses

60c each; \$5.50 for 10

AMERICAN PILLAR—Bright carmine-pink single flowers with ivory centers and yellow stamens; extremely vigorous.

AVIATEUR BLERIOT—Orange-yellow buds and flowers; double; borne in large clusters; strong grower.

CLIMBING AMERICAN BEAUTY—Crimson-pink fragrant flowers borne in clusters. A very popular climber.

CRIMSON RAMBLER—The best known rose of this class. A very strong grower.

DR. HUEY—Large dark crimson flowers set off by bright golden anthers; borne in large clusters.

DR. VAN FLEET—Pinkish-cream flowers of wonderful form borne on long individual stems. A very popular variety.

DOROTHY PERKINS—Beautiful shell-pink clustered flowers; dark lustrous foliage, a rampant grower.

EXCELSA (Red Dorothy Perkins)—Scarlet-crimson.

FLOWER OF FAIRFIELD—The ever-blooming crimson Rambler.

MARY WALLACE—Very large vivid pink flowers with a yellow shade at base of the petals; vigorous.

MME. GREGOIRE STAECHELIN—It is the opinion of rose connoisseurs the world over that this wonderful new Spanish rose is the queen of pink climbers. The large soft-pink flowers, with crimson stained petals are borne profusely on long stems, amid dark green foliage. Vigorous. \$1.00.

PAUL'S SCARLET CLIMBER—Semi-double flowers of intense scarlet; borne profusely in clusters; strong grower; healthy foliage.

WHITE DOROTHY PERKINS—Identical to Dor. Perkins in everything but color.

Hardy Hybrid Polyanthas Baby Rambler Roses

60c each

Roses of this class are used mostly for massing, or for borders; they are constantly covered with small, clustered flowers. Ordinarily they do not grow more than 18 inches high.

CRIMSON BABY RAMBLER—Bright crimson clustered flowers; continuous bloomer.

CHATILLION—Without doubt the very best pink rose of this class for bedding or massed planting; semi-double flowers; clear pink.

EBLOUISSANT — Very dark red flowers; large trusses; very floriferous.

GOLDEN SALMON — Vivid orange-scarlet flowers; borne in large compact clusters; vigorous.

IDEAL—Dark blackish red flowers; borne in full trusses; good grower.

LA FAYETTE—Very large semi-double flowers of pinkish-crimson borne in large loose clusters; a constant bloomer, and a great bedding rose.

THESE ROSES ARE BUDDED, WELL
ROOTED, FIELD GROWN PLANTS, VIGOR-
OUS AND HEALTHY, AND WE GUARAN-
TEE THEM TO REACH OUR CUSTOMERS
IN THE BEST OF CONDITION.
